PIC LIQUID BAIT ANT KILLER is a liquid, containing Sodium Tetra Borate Deca Hydrate (Borax) and is not flammable, combustible or explosive and presents no unusual hazard if involved in a fire. PIC LIQUID BAIT ANT KILLER presents little or no hazard (to humans) and has low acute oral and dermal toxicities. TARGET ORGANS: No target organ has been identified in humans. High dose animal ingestion studies indicate the testes are the target organs in male animals, though human studies have not shown such results.

Small amounts (e.g. a teaspoon) swallowed accidentally are not likely to cause effects; swallowing amounts larger than that may cause gastrointestinal symptoms. Ingestion is the most significant route of exposure in occupational and other settings. Ingestion of small quantities may cause gastric distress, diarrhea and vomiting. High doses (< 15 g in infants; 15-60 g in adults) have caused death. Chronic use may cause borism.

*European studies completed in 2009 (directive 98/8/EC) indicate toxic warning symbols and reproductive toxicity warning phrases for these chemicals are required. These studies however focused on the use of these chemicals as wood preservatives where leaching of the borates could occur. For this product's application as an ant control product this is unlikely to occur and human exposure to the product is minimal. The packaging and physical form (paste) of this product therefore makes the concerns highlighted in this report of minimal consequence.					
NOTES: This Material Safety Data Sheet is prepared to comply with the United States Occupational Safety and Health Administration (OSHA) Hazard Communication Standard (29 CFR 1910.1200), the Canadian Workplace Hazardous Materials Information System (WHMIS), and European Union Directive 1997/2006/EC (REACH). Hazard symbols and risk phrases are based on maximum listed concentration of each hazardous ingredient. Unlisted ingredients are not "hazardous" per the OSHA Hazard Communication Standard (29 CFR 1910.1200), the Canadian Workplace Hazardous Materials Information System (WHMIS) or the European (GHS) directive 91/155/EEC and are considered trade secrets under US Federal Law (29CFR and 40CFR), Canadian Law (Health Canada Legislation), and European Union Directive 67/548/EEC.					
SECTION 4 - FIRST AID MEASURES					
INHALATION: Inhalation of vapors not possible in the supplied product form and Borax is not volatile.					
EYES: Remove contact lenses. Immediately flush eyes for 15 minutes minimum with clear potable water. If irritation persists get medical attention.					
SKIN: Wash exposed skin with soap and water. See a physician if irritation persists.					
INGESTION: Give large quantities of water. Do not induce vomiting except of the advice of a medical professional. Never administer anything by mouth to an unconscious person. Seek immediate medical attention, show the label if available to first responders.
