#### Product Name: Yellow Jacket Lure/Wasp lure chips

The Yellow Jacket/Wasp lure consists of an inert poly pellets containing the food grade pheromone/kairomone active ingredient. The lures are sealed in separate impermeable foil pouches for shipping and storage. The product is intended for use as an attractant to lure yellow jackets and wasps into traps.

### Section 2 Hazards Identification

Precautionary Statements: N/A

Non-toxic

### Section 3: Composition / Information on Ingredient

Insect attractant lures do not contain ingredients in any quantity to be hazardous. Quantity is generally microgram to milligram amounts.

Active ingredient is a synthetic insect attractant that is also used in food flavorings and fragrances. The attractant is saturated into an inert plastic pellet for slow release.

### Section 4 First Aid Measures

Pheromones are non-toxic biochemical compounds.

### Section 5 Fire and Explosion Hazards

**Flash Point:** (CC, F): In formulation: N/A

**Flammable Limits:** In formulation: N/A

**Extinguishing Media:** N/A

**Special Fire Fighting Procedures:** N/A  
**Unusual fire and explosion Hazards:** N/A

## **Section 6 Precautions for Safe Handling and Use**

**Procedure to be followed in case of leak or spill:** Dispose of lure and/or trap in as approved manner. No protective apparatus necessary for clean-up.

**Handling:** Keep the lures inside the package until use.. Pheromone will volatilize from the lure over a 4-5 week period depending on temperature.

**Storage:** Suitable: Keep away from heat, sparks and open flame, store at room temperature.

## **Section 7 Control Measures**

**Eye Protection:** N/A

**Respiratory Protection:** N/A

**Work / Hygiene Measures:** Good personal hygiene practices should be used.

## **Section 8 Other Information**

### **Disclaimer:**

For use in traps.
